# **SOCIAL ADVANCEMENT FOUNDATION OF INDIA CONSTRUCITON OF APPROACH ROAD**

## **Introduction**

Social Advancement Foundation of India (SAFI) is a nonprofit charitable trust established in September 2001 for the upliftment and transformation of educationally backward classes, particularly Muslim community in to a progressive and advanced society. The trust is constituted by educationists, philanthropists and social activists with the objective of providing for academic and research programmes in frontier areas of science and technology and humanities, maintaining international standards. The vision of SAFI is the transformation of our people into an intellectually and morally advanced society competent and dynamic enough to meet the challenges of the modern world. SAFI envisages the emergence of competent leaders in every field.

SAFI Institute of Advanced Study (SIAS) is the most important institution conceived for the fulfillment of its mission. It is to be developed as a hub for post graduate study and research, a centre of excellence, which should in due course become a University or a deemed university. It requires careful advance preparation and massive investment. We have already acquired about 440 acres of land of which about 150 acres is set-apart for developing a campus and rest for developing a Township. We have already provided a magnificent building for housing the existing post graduate department of study like Biotechnology, Bio informatics, Mass Communication and journalism & Islamic Studies. The investment so far is about Rs. 20 crores. It has been the result of the generosity of our patrons.

For the institution to develop into a full fledged campus, much more facilities are essential and we approach our patrons with the hope that they will support or sponsor this project so that Safi Institute of Advanced Study will evolve into an ideal campus.

## **Background**

An essential requisite of an educational campus is its road connectivity with outside world. This assumes particular significance for remotely situated educational institutions. The road connectivity enhance development and progress of the institution, eases mobility of students and staff and improves public contacts.

SAFI campus is coming up on a hilltop in Vazhayoor village in Malappuram District. This location is about 15 km from Calicut city. The nearest highway is in Ayikkarappadi, which is about 7 km away. There is a PWD Road up to the entrance of the campus. This road is not in a good condition and it is to be renovated by the PWD. From the entrance to our main building an approach road has to be built by us. The preliminary work on this has been done. The road has already been demarcated and considerable earth work has been done and also minimum buttress walls have been constructed. It has to be made more even and black topped. This requires a certain amount of leveling, earth work and further heightening of the buttress wall were required. The approximate cost is estimated as Rs. 14 lakhs (Fourteen Lakhs). The road is from the entrance of the campus to the academic building which will have about 600 metres length and 20 metre width.

## **Objective**

The project is aimed at constructing a bitumen road stretching from the main gate of the campus to the main academic building.

## **Location**

The road will be constructed by SAFI in the Campus.

## **Project of cost**

The cost of construction of the road is estimated to be **14 Lakhs (Rupees fourteen lakhs only)**

## **Project implementation and monitoring**

The project is to be completed during 2008-09 academic year.
