PROJECT FOR CONSTRUCTION OF STAFF QUARTERS

Introduction

Social Advancement Foundation of India (SAFI) is a nonprofit charitable trust established in September 2001 for the upliftment and transformation of educationally backward classes, particularly Muslim community in to a progressive and advanced society. The trust is constituted by educationists, philanthropists and social activists with the objective of providing for academic and research programmes in frontier areas of science and technology and humanities, maintaining international standards. The vision of SAFI is the transformation of our people into an intellectually and morally advanced society competent and dynamic enough to meet the challenges of the modern world. SAFI envisages the emergence of competent leaders in every field.

SAFI Institute of Advanced Study (SIAS) is the most important institution conceived for the fulfillment of its mission. It is to be developed as a hub for post graduate study and research, a centre of excellence, which should in due course become a University or a deemed university. It requires careful advance preparation and massive investment. We have already acquired about 440 acres of land of which about 150 acres is set-apart for developing a campus and rest for developing a Township. We have already provided a magnificent building for housing the existing post graduate department of study like Biotechnology, Bio informatics, Mass Communication and journalism & Islamic Studies. The investment so far is about Rs. 20 crores. It has been the result of the generosity of our patrons.

For the institution to develop into a full fledged campus, much more facilities are essential and we approach our patrons with the hope that they will support or sponsor this project so that Safi Institute of Advanced Study will evolve into an ideal campus.

Project in detail:-

Safi Institute of Advanced Study run by SAFI Trust is situated in a rather remote area. The teaching faculty as well as the non teaching staff are living in distant localities and reaching the Institute daily by private vehicles. It is not only very difficult for them but also it takes away much of their useful time for academic work. Besides, the Institution has to be developed as a residential campus. It is absolutely necessary that residential accommodation should be provided for majority of the teachers and non teaching staff for the effective functioning of the residential campus. It is expected that the faculty strength will be increased to 100 in the long run from the existing 25 and non teaching staff to 50 from the present 15.

Hence a proposal for the construction of the required staff quarters in stages. In the first stage it is proposed to construct 15 quarters for the teachers and 10 quarters for the non teaching staff with reasonable facilities. For teaching staff the approximate amount required will be Rs. 10 lakhs per quarters and that of non teaching staff will be Rs. 8 lakhs per quarters. It is desirable that quarters can also be constructed as flats. The total estimate for the construction of 25 quarters will come to Rs. 230 lakhs. If the choice is for flats there may be a small reduction in the total estimated amount.

Objective

To construct 25 staff quarters for teaching and non teaching staff in the SAFI campus.

Location

The Staff Quarters will be constructed in a convenient place selected for the purpose.

Project Cost

The cost of construction of the Staff Quarters is estimated to be Rs. 230 lakhs (Rupees two hundred and thirty lakhs only)

Project implementation and monitoring

The project will be implemented in a year. The proposed Staff Quarters so constructed will be dedicated in the name of the donor or his nominee.
