SOCIAL ADVANCEMENT FOUNDATION OF INDIA

CONSTRUCTION OF HEALTH CENTRE

Introduction

Social Advancement Foundation of India (SAFI) is a nonprofit charitable trust established in September 2001 for the upliftment and transformation of educationally backward classes, particularly Muslim community into a progressive and advanced society. The trust is constituted by educationists, philanthropists and social activists with the objective of providing for academic and research programmes in frontier areas of science and technology and humanities, maintaining international standards. The vision of SAFI is the transformation of our people into an intellectually and morally advanced society competent and dynamic enough to meet the challenges of the modern world. SAFI envisages the emergence of competent leaders in every field.

SAFI Institute of Advanced Study (SIAS) is the most important institution conceived for the fulfillment of its mission. It is to be developed as a hub for post graduate study and research, a centre of excellence, which should in due course become a University or a deemed university. It requires careful advance preparation and massive investment. We have already acquired about 440 acres of land of which about 150 acres is set-apart for developing a campus and rest for developing a Township. We have already provided a magnificent building for housing the existing post graduate department of study like Biotechnology, Bio informatics, Mass Communication and journalism & Islamic Studies. The investment so far is about Rs. 20 crores. It has been the result of the generosity of our patrons.

For the institution to develop into a full fledged campus, much more facilities are essential and we approach our patrons with the hope that they will support or sponsor this project so that Safi Institute of Advanced Study will evolve into an ideal campus.

Background

The SAFI Institute of Advanced Study (SIAS) which is a Post Graduate Centre proposed to be developed as a Deemed University is situated in a rather remote area, where medical facilities are not readily available. It is necessary that medical facilities should be available on the spot because men & women students are of different health conditions particularly women students. It is expected that the students' strength will be raised to 750 to 800 within 3 years. The total strength including teachers will be 1000. Therefore, a suitable health centre with necessary facilities and staff should be provided in the spot. A suitable building for the purpose is necessary.

Objective

The project aims at constructing a health centre in the SAFI main campus.

Location

The proposed building for health centre will be constructed by SAFI in its main campus in a convenient place.

Project Cost

The cost of construction of the health centre is estimated to be Rs. 40 lakhs

Project implementation and monitoring

The project will be implemented within in a year. The health centre so constructed will be dedicated in the name of the donor or his nominee.
